

India Meteorological Department
FDP STORM Bulletin No.57(01-05-2017)

1. CURRENT SYNOPTIC SITUATION at 0300UTC of the Day:

SYNOPTIC FEATURES:

The trough at mean sea level from west Rajasthan to southern parts of Gangetic West Bengal, now runs from north Rajasthan to Gangetic West Bengal across Uttar Pradesh, Madhya Pradesh and Jharkhand.

An upper air cyclonic circulation lies over southwest Rajasthan & neighbourhood and extends upto 2.1 Km above mean sea level.

The upper air cyclonic circulation over west Uttar Pradesh & neighbourhood, now lies over northwest Uttar Pradesh & neighbourhood between 1.5 & 3.1 Km above mean sea level.

An upper air cyclonic circulation lies over East Uttar Pradesh & neighbourhood and extends upto 1.5 Km above mean sea level.

A trough runs from East Uttar Pradesh to West Vidarbha and extends upto 1.5 Km above mean sea level.

A trough in mid tropospheric westerlies runs from East Madhya Pradesh to Maldiva area across Telangana, South Interior Karnataka and Kerala.

A wind discontinuity runs from north Telangana to Maldiva area across Rayalaseema, South Interior Karnataka & Kerala and extends upto 0.9 Km above mean sea level.

The upper air cyclonic circulation over east Assam & neighbourhood extending upto 0.9 km above mean sea level persists.

A fresh feeble Western Disturbance likely to affect Western Himalayan region from tomorrow onwards.

The Western Disturbance as an upper air cyclonic circulation over northeastern parts of Jammu & Kashmir and neighbourhood extending upto 3.6 Km above mean sea level with a trough aloft at 5.8 km above mean sea level roughly along Long. 78.0°E and north of Lat. 30.0°N has moved away northeastwards.

The trough in low level easterlies from Maldiva area to coastal Karnataka at 1.5 Km above mean sea level has become less marked.

The trough from east Bihar to Telangana across Jharkhand and Chhattisgarh extending upto 1.5 km above mean sea level with two embedded upper air cyclonic circulations one over Jharkhand and another over Coastal Andhra Pradesh both extending upto 0.9 km above mean sea level has become less marked.

SATELLITE OBSERVATIONS during past 24hrs and current observation:

Current Observation (based on 0300UTC imagery of INSAT 3D):

Convective Activity and cloud description:

Cell No	Date/Time (UTC)	Area/Location	CTBT (-°C)	Movement	Remarks If any
5	01/0000	W Uttar Pradesh adjoining NEPAL	44		Developing
	01/0100	NE Uttar Pradesh adjoining NEPAL	44		Developing
	01/0200	-Do-	42		Developing
	01/0300	NE Uttar Pradesh adjoining NW Bihar & NEPAL	44		Dissipating

Scattered low/medium clouds with embedded isolate weak to moderate convection seen over Chhattisgarh, North Odisha, Jharkhand, Gangetic West Bengal, Sikkim, Northeast states, East Vidarbha, South Coastal Andhra Pradesh, Rayalaseema, . Scattered low/medium clouds seen over Jammu & Kashmir, South Uttar Pradesh, Northwest Bihar, Scattered low/medium clouds with embedded moderate to intense convection seen over Northeast Uttar Pradesh, East Madhya Pradesh, West Vidarbha, North Coastal Andhra Pradesh, Karnataka, Kerala, Tamilnadu and Bay Islands.

Arabian Sea:

No Significant clouds over the region.

Bay of Bengal & Andaman Sea:

Scattered low/medium clouds with embedded weak to moderate convection seen over Andaman Sea and Southeast Bay.

Past Weather:

Convection: Moderate to Intense convection was observed over J&K Himachal Pradesh Uttar Pradesh South Haryana Delhi Madhya Pradesh Maharashtra Bihar Jharkhand West Bengal North East States Telangana Kerala Tamilnadu.

OLR: - Upto 230 wm^{-2} was observed over J&K Himachal Pradesh Uttarakhand Sikkim Arunachal Pradesh Vidarbha West Bengal Telangana.

Upto 250 wm^{-2} was observed over Delhi Uttar Pradesh Madhya Pradesh Chhattisgarh Bihar Jharkhand rest North-East States Coastal Andhra Pradesh South Kerala & West Tamilnadu.

Westerly Trough & Jet-Stream: No Trough & Jet stream observed over India.

Dynamic Features:

Positive shear tendency is observed over India.

Medium to high wind shear is observed over India.

A positive Vorticity field is observed over East Madhya Pradesh Kerala Karnataka Chhattisgarh & Odisha.

Positive Low Level Convergence is observed over Rajasthan Maharashtra East Madhya Pradesh and Negative low level convergence is observed over rest parts of India.

Precipitation:

IMR: Rainfall upto 20 mm was observed over North-East Jharkhand North Gangetic West Bengal Meghalaya.

Rainfall upto 10 mm was observed over J&K Himachal Pradesh Uttarakhand West Uttar Pradesh North-West Madhya Pradesh Bihar Sub Himalayan West Bengal Sikkim Arunachal Pradesh Assam Nagaland South Kerala West Tamilnadu.

HEM: Rainfall upto 70 mm was observed over South-West J&K, South North Uttarakhand Meghalaya.

Rainfall upto 07 mm was observed over South Haryana Delhi Himachal Pradesh Uttar Pradesh Bihar Jharkhand West Bengal Northeast States Rayalaseema North Madhya Maharashtra South Kerala & West Tamilnadu.

RADAR and RAPID observation:

No significant convection was observed in Radar Composite of 1230UTC and RAPID RGB Satellite imagery of 1200hrs IST.

Environmental condition (dust etc) and its forecast based on 00UTC of date:

Dust concentration was observed over northern Africa and some parts of eastern Asia. Dust concentration is expected to increase over western and northern India for next five days.

High PM10 concentration was observed over north-western and northern India. PM10 concentration is expected to decrease over northern India for next five days.

2. NWP MODEL GUIDANCE:

NCMRWF (NCUM Forecasts based on 00UTC of the day):

1. Weather Systems: 12UTC Charts of Day-0 to Day-3 show feeble trough in MSLP over J & K. 12UTC charts on all days from Day0-4 show two zones of wind discontinuity at 925 hPa due to persistent anticyclonic flow over Arabian Sea and Bay of Bengal :(i) SW-NE extending from northern Karnataka-Telangana region to Odisha region. (ii) S-N extending from southern parts of TN to northern parts of Telangana-AP region. Trough at 850 hPa over GWB and SHWB in Day0-1. A CYCIR over the same region in Day-3-4. A CYCIR over Punjab and adjoining Pakistan in Day-2 at 850 hPa
At 500 hPa trough over west of J & K in Day-2-3.

Two prominent anti-cyclonic circulations at 850 hPa over Arabian Sea and Bay of Bengal from day-0 to Day-4.

2. Location of jet and jet core at 500hPa:-500hPa Jet core (>60kt): Weaker core winds at 12 UTC on all days over India.

3. Convergence at 850 hPa: At 12UTC Day-0: At some isolated locations over Odisha, Jharkhand, Chhattisgarh. Additionally over Maharashtra along the western Ghats. At 12UTC Day-1: Prominent high values along the western ghats and lower values at isolated locations over central India, Assam and over Rajasthan.

At 12UTC Day-2: Prominent high values along the western ghats and lower values at isolated locations over central India and over Rajasthan. At 12UTC on Day-3&4: Over Assam, Central India over parts of Jharkhand, Chhattisgarh and MP.

4. Low level Vorticity:-Positive Vorticity (>15 x 10⁻⁵/s): At 12UTC on Days 1-2 : over Assam-Arunachal region. At 12UTC day2 : over several isolated locations of NW India, Punjab, Haryana, Delhi NCR and parts of western UP. At 12UTC on Day-3: Over SHWB and GWB and adjoining Bihar and Jharkhand. At 12UTC on Day-3-4: Assam and adjoining Arunachal. At 00UTC : very high values along the line of low level confluence and strong convergence.

5. Showalter Index: Day-wise Sub-divisions with Showalter index <-4: Day0: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Sub Himalayan WB, Gangetic WB, Jharkhand, Bihar, Uttarakhand, Odisha, Konkan Goa, Coastal AP, Telangana, Rayalaseema, TN Puducherry, Coastal Karnataka, NI Karnataka, SI Karnataka, Kerala,

Day1: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Sub Himalayan WB, Gangetic WB, Uttarakhand, Himachal Pradesh, Jammu Kashmir, Odisha, Saurashtra Kutch, Coastal AP, Telangana, TN Puducherry, Coastal Karnataka, SI Karnataka, Kerala,

Day2: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Sub Himalayan WB, Uttarakhand, Himachal Pradesh, Jammu Kashmir, Odisha, Konkan Goa, Madhya Maharashtra, Coastal AP, TN Puducherry, Coastal Karnataka, SI Karnataka, Kerala,

Day3: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Sub Himalayan WB, Gangetic WB, Jharkhand, Bihar, East UP, Uttarakhand, Himachal Pradesh, Jammu Kashmir, Odisha, Konkan Goa, Madhya Maharashtra, TN Puducherry, Coastal Karnataka, NI Karnataka, SI Karnataka, Kerala,

Day4: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Sub Himalayan WB, Bihar, Uttarakhand, Himachal Pradesh, Jammu Kashmir, Odisha, Konkan Goa, Madhya Maharashtra, Coastal AP, TN Puducherry, Coastal Karnataka, NI Karnataka, SI Karnataka, Kerala,

6. K-Index: Daywise Sub-divisions with K-index >40: Day0: Arunachal Pradesh, Sub Himalayan WB, Gangetic WB, Jharkhand, Odisha, Chhattisgarh, Coastal AP, Telangana, Rayalseema, TN Puducherry, Coastal Karnataka, NI Karnataka, SI Karnataka, Kerala,
Day1: Arunachal Pradesh, NE NMMT, Sub Himalayan WB, Uttarakhand, Himachal Pradesh, Odisha, Vidarbha, Chhattisgarh, Coastal AP, Telangana, Rayalseema, TN Puducherry, Coastal Karnataka, SI Karnataka, Kerala,
Day2: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Sub Himalayan WB, Uttarakhand, Himachal Pradesh, Jammu Kashmir, Odisha, Konkan Goa, Madhya Maharashtra, Vidarbha, Chhattisgarh, Rayalaseema, TN Puducherry, Coastal Karnataka, NI Karnataka, SI Karnataka, Kerala,
Day3: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Sub Himalayan WB, Gangetic WB, Bihar, East UP, Uttarakhand, Himachal Pradesh, Jammu Kashmir, Odisha, Konkan Goa, Madhya Maharashtra, Chhattisgarh, Telangana, Rayalaseema, TN Puducherry, Coastal Karnataka, NI Karnataka, SI Karnataka, Kerala,
Day4: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Sub Himalayan WB, Uttarakhand, Odisha, Konkan Goa, Madhya Maharashtra, Chhattisgarh, Coastal AP, TN Puducherry, Coastal Karnataka, NI Karnataka, SI Karnataka, Kerala

7. Spatial distribution of TTI: Daywise Sub-divisions with TTI >52: Day0: Arunachal Pradesh, Assam Meghalaya, Sub Himalayan WB, Gangetic WB, Jharkhand, Bihar, East UP, West UP, Uttarakhand, Himachal Pradesh, Jammu Kashmir, Odisha, Konkan Goa, Madhya Maharashtra, Chhattisgarh, Coastal AP, Telangana, Rayalaseema, TN Puducherry, Coastal Karnataka, NI Karnataka, SI Karnataka, Kerala,
Day1: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Gangetic WB, Uttarakhand, Punjab, Himachal Pradesh, Jammu Kashmir, West RJ, Odisha, Saurashtra Kutch, Coastal AP, Telangana, Coastal Karnataka, SI Karnataka,
Day2: Arunachal Pradesh, Sub Himalayan WB, Uttarakhand, Himachal Pradesh, Jammu Kashmir, West RJ, East RJ, West MP, Konkan Goa, Madhya Maharashtra,
Day3: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Sub Himalayan WB, Gangetic WB, Jharkhand, Bihar, East UP, Uttarakhand, Hry Chd Delhi, Punjab, Himachal Pradesh, Jammu Kashmir, Odisha, Konkan Goa, Madhya Maharashtra, Vidarbha, Chhattisgarh,
Day4: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Sub Himalayan WB, Uttarakhand, Himachal Pradesh, Jammu Kashmir, West RJ, Odisha, Konkan Goa, Madhya Maharashtra, Chhattisgarh, Coastal AP, Coastal Karnataka, NI Karnataka,

8. Rainfall: Daywise Sub-divisions with Precipitation>2cm:

Day1: Arunachal Pradesh, Assam Meghalaya, Sub Himalayan WB, Gangetic WB, Bihar, East UP, Odisha, SI Karnataka, Kerala,
Day2: Arunachal Pradesh, Assam Meghalaya, NE NMMT,
Day3: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Uttarakhand, Himachal Pradesh, Jammu Kashmir,
Day4: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Sub Himalayan WB, Bihar,
Day5: Arunachal Pradesh, Assam Meghalaya, NE NMMT, Sub Himalayan WB

IMD GFS (T1534) based on 00UTC the day:-

1. Weather Systems: The CYCIR over east Uttar Pradesh and adjoining areas in the model analysis moves eastward and lies over Bihar and adjoining areas on day1 and becomes embedded in a trough orienting south-west to north-east direction from Bihar to Madhya Pradesh. The trough persists over the region till day 4. Forecasts show the north-east end of the trough moves a bit eastward over SHWB and adjoining Assam in day 4 and 5. In the forecasts, a north-south trough extending from east UP to south peninsula would persist during next 3 days. The wind at 500 hPa shows a feeble trough in westerlies over central India moves eastward during next two days to cross over NE states.

2. Location of jet and jet core at 500 hPa:-500 hPa Jet core (>60kt): No presence of jet core over the Indian region for the next 5 days except a zone strong wind over parts of north-eastern states.

3. Low level Vorticity:-Positive Vorticity 850hPa (>12 x 10⁻¹/s): Mostly along the foot hill of Himalaya, and along troughs over north, central and south peninsular India during next 5 days. Prominent vorticity zones are found during morning hours.

4. Spatial distribution of T-Storm Initiation Index, Lifted Index, Total Total Index, CAPE, CINE and Sweat Index (High potential for thunderstorm):

T-Storm Initiation Index (> 4): Less than threshold value all over the country during next 5 days. The values between 3-3.5 mostly along east coast, eastern part of the country, along west coast and over Gujarat during the same period.

Lifted Index (< -2): Less than threshold value mostly along east coast, south peninsula, west coast and Gujarat and also over Gangetic West Bengal, Jharkhand and parts of Bihar, east UP and north eastern states during next 5 days.

Total Total Index (> 50): Above threshold value over the most parts of central, northwest and eastern parts of India during afternoon hours for next 5 days.

Sweat Index (> 300): Mostly along east coast, along west coast, Gujarat and adjoining areas eastern part of India and north eastern states during next 5 days.

CAPE (> 1000): Has nearly similar features of sweat index.

CINE (50-150): Mostly along east coast, west coast, Gujarat and adjoining areas, parts of north eastern states, over Gangetic plains and eastern part of India during morning hours for next 5 days.

5. Rainfall and Rainfall activity:

10-70 mm rainfall over Gangetic West Bengal, SHWB, parts of Bihar and NE states during day 1.

10-40 mm rainfall over parts of costal Andhra Pradesh and adjoining areas during day 1.

3. IOP ADVISORY FOR 24 and 48Hrs:

Summary and Conclusions:

In association with the above weather systems over North India, a region of strong wind convergence between Northwesterlies and southwesterlies persists over Northeast India. Hence rainfall will persist over the northeast Indian region on day 1. It is likely to decrease on day 2. The upper air cyclonic circulation over southwest Rajasthan & neighbourhood is likely to give isolated thunderstorms over the region on day 1. The wind discontinuity in the lower levels from north Telangana to Maldives area superposed by a trough in mid tropospheric westerlies from East Madhya Pradesh to Maldives area is likely to result in thunderstorm activity all along the east coast of India and southwest peninsular India on day 1 and day 2.

The guidance from the NWP model output from ECMWF, IMD1534 and NCEP, IITM GFS, NCUM, NEPS and Satellite imageries are also suggesting the similar area of rainfall activities on Day1 and Day2.

24 hour Advisory for IOP:

Sub Himalayan West Bengal and Sikkim, Arunachal Pradesh and West Assam
Rest Assam, Meghalaya, Nagaland, Manipur, Mizoram and Tripura
South Interior Karnataka, Kerala, Interior Tamil Nadu
Coastal Andhra Pradesh
Rayalseema, South Madhya Maharashtra, Vidarbha, Chhattisgarh, East Madhya Pradesh
Orissa, Jharkhand, Bihar, Gangetic West Bengal
North Rajasthan

48 hour Advisory for IOP:

Assam, Meghalaya, Nagaland, Manipur, Mizoram and Tripura
South Interior Karnataka, Kerala, Interior Tamil Nadu
Vidarbha, Chhattisgarh, East Madhya Pradesh

Paradeep	01-05-17	30/0300-2300 UTC	Isolated Single cells with average height of 9 kms. and average reflectivity of 20 dBZ and very small areas having reflectivity values of the order of 44 dBZ.	Position: NW sector of RADAR (270-350 degrees) Range:80-250 kms from the RADAR. Movement: Westerly	Mainly concentrated in SW sector in the sea.	TS with low probability of Rain.	Mayurbhanj, Keonjhar, Balangir, Kalhandi, Kandhamal, Ganjam and Nayagarh.

Radar Station name	Date	Time interval of observation (UTC)	Organization of the cells (Isolated single cells/multiple cells/ convective regions/ squall lines) with height of 20 dBZ echo top and maximum reflectivity	Formation w.r.t radar station and Direction of movement	Remarks	Associated severe weather if any	Districts affected
Hyderabad	30/04 to 01/05-17. (0300 UTC to 0300 UTC)	30/0902-1042 UTC	Isolated cells with an average height of 12 Km with a max reflectivity of 60.5 dBZ	SSE (122 Kms) moving in ESE- ly Direction at a speed of 6 Kmph.	Cells started forming at 0902 UTC at SSE direction from radar, Matured a bit in size. Max reflectivity was between 1042 UTC and dissipated at 1002 UTC	Moderate Thunderstorm with or without rain	Areas near Mahabubnagar district
		30/ 0952-1152 UTC	Isolated cells with an average height of 9 Km with a max reflectivity of 58 dBZ	SW (72 Kms) Not moving much	Cells started forming at 0952 UTC at SW from radar, matured bet.. 1102 and 1132 UTC and dissipated at 1152 UTC	Moderate Thunderstorm with or without rain	Not Known.
		30/1102 -1232 UTC	Isolated cells with an average height of 12 Km with a max reflectivity of 58 dBZ	S (22 Kms) moving in E- ly Direction at a speed of 4 Kmph, veryslow	Cells started forming 1102 UTC S from radar, Matured a bit in size. Max reflectivity was between 1122 and 1152 UTC .	Moderate Thunderstorm with or without rain	RR, Shamshabad Airport
		30/ 1132-1302 UTC	Isolated cells with an average height of 9 Km with a max reflectivity of 51.5 dBZ	WNW (120Kms) moving in SW- ly Direction at a speed of 12 Kmph.	Cells started forming at 1132 UTC at SW from radar, Matured a bit in size. Max reflectivity was between 1202 and 1242 UTC .	Moderate Thunderstorm with or without rain	Not known.
		30/ 1202-1402 UTC	Isolated cells with an average height of 11 Km with a max reflectivity of 56.5 dBZ	SE (74 Kms) moving in NE- ly Direction at a speed of 12 Kmph.	Cells started forming at 1202 UTC at SE from radar, Matured a bit in size. Max reflectivity was between 1302 and 1332 UTC.	Moderate Thunderstorm with or without rain	Nalgonda Dist
		30/1622-1752 UTC	Isolated cells with an average height of 9 Km with a max reflectivity of 48.5 dBZ	S(87Kms) moving in E- ly Direction at a speed of 8 Kmph.	Cells started forming at 1622 UTC at S from radar, Matured a bit in size. Max reflectivity was between 1652 and 1722 UTC.	Light Thunderstorm with or without rain	Mahaboobnagar Dist

Radar Station Name	Date	Time Interval of Observation (UTC)	Organisation of cells (Isolated single cells /multiple cells/ convective regions /squall lines) with height of 20 dBZ echo top and maximum reflectivity	Formation w.r.t. radar station and Direction of movement	Remarks	Associated Severe Weather if any	Districts affected
Kolkata	01-05-17	30/0301 – 0822 UTC	NIL	NIL	NO SIGNIFICANT ECHO	NIL	NIL
		30/0822 – 2142 UTC	1. Single cell with maximum reflectivity of 62.5 dBz at 1041 UTC and maximum height of 13.79 Km at 1041 UTC .	1. W (233 km) Moving in E-ly direction with a speed of 30 kmph	1. Formation started at 0832 UTC in W at a distance of 233 km from Radar. Matured and dissipated at 1241UTC in W at a distance of 118 km from Radar.	Hailstorm /Thunderstorm /Squall / Rain	N/A
			2. Extended multi cell converted to squall line with maximum reflectivity of 68.5dBz at 1111 UTC and maximum height of 17.9 Km at 1121 UTC	2. NW (247 km) Moving in ESE-ly direction with a speed of 50 kmph	2. First observed at 0951 UTC in NW at a distance of 247 km from Radar. Matured. Squall line formed at 1231 UTC. Merged with 3 at 1251 UTC	Hailstorm /Thunderstorm /Squall / Rain	N/A
			3. Initially single cell but developed in Extended multi cell with maximum reflectivity of 67.5 dBz at 1202 UTC and maximum height of 17.37 Km at 1151 UTC	3. WNW (248 km) Moving in E-ly direction with a speed of 38 kmph	3. First observed at 0951 UTC in WNW at a distance of 248 km from Radar. Matured. Merged with 2 at 1251 UTC	Hailstorm /Thunderstorm /Squall / Rain	N/A
		30/0822 – 2142 UTC	4. Multicelled system with squall line with maximum reflectivity of 69.5 dBz at 1312 UTC and maximum height more than 18 km at 1312 UTC .	4. WNW to N (123 km) Moving in ESE-ly direction with a speed of 65 kmph	4. Formed merging 2 and 3 at 1251 UTC from WNW to N at a distance of 123 km from Radar. Matured and dissipated at 1751 UTC in ENE at a distance of 184 km from Radar.	Hailstorm /Thunderstorm /Squall / Rain	N/A
			5. Isolated cells with maximum reflectivity of 63.5dBz at 1801 UTC and maximum height of 12.0 Km at 1611 UTC	5. W (82 km) Moving in E-ly then NE-ly direction with a speed of 47 kmph	5. Isolated cells started developing in W at a distance of 82 km from radar from 1451 UTC Merged to a multicelled system at 1851 UTC . Matured and dissipated at 2142 UTC in NE at a distance of 118 km from Radar.	Hailstorm /Thunderstorm /Squall / Rain	N/A
		30/2151 – 2352 UTC	NIL	NIL	NO SIGNIFICANT ECHO	NIL	NIL
		01/0001 – 0351 UTC	NIL	NIL	NO SIGNIFICANT ECHO	NIL	NIL

Radar Station Name	Date	Time Interval Of Observation (UTC)	Organisation Of The Cells(Isolated Single Cells/ Multiple Cells/ Convective Regions/ Squall Lines) With Height Of 20 dbZ echo top and maximum reflectivity	Formation w.r.t. radar station and Direction of movement	Remarks	Associated severe weather if any	Districts affected
PATNA	01/05 /2017	300300 - 300910	NIL	NIL	N/A	N/A	N/A
		300920 - 301020	Single Cell. Maximum Reflectivity : 50 dBZ Echo Top : 14 KM	Range : 160 KM from DWR Patna in South- West. Movement-North- Easterly	Warning E-mail and Fax sent to State Disaster management Authority and Concern DMs	N/A	Bhabua, Sasaram, Rohtas
		301020 - 301220	Multiple Cell. Maximum Reflectivity : 50 dBZ Echo Top : 14 KM	Range : 120 KM from DWR Patna in South- South- West. Movement- North-Easterly	Warning E-mail and Fax sent to State Disaster management Authority and Concern DMs	THUNDER- STORM, SQUALL(At Gaya) WITH RAIN	Gaya, Nawada, Jamui, Banka
		301220 - 301420	Single Cell. Maximum Reflectivity : 50 dBZ Echo Top : 14 KM	Range : 110 KM from DWR Patna in West- South- West. Movement- Easterly	Warning E-mail and Fax sent to State Disaster management Authority and Concern DMs	N/A	Buxar, Bhojpur, Jehanabad, Patna
		301240 - 301430	Single Cell. Maximum Reflectivity : 45 dBZ Echo Top : 9.3 KM	Range : 090 KM from DWR Patna in South- South-East. Movement- North-Easterly	Warning E-mail and Fax sent to State Disaster management Authority and Concern DMs	N/A	Nalanda, Nawada, Lakhisarai, Munger
		301500 - 301600	Multiple Cell. Maximum Reflectivity : 45 dBZ Echo Top : 10.5 KM	Range : 170 KM from DWR Patna in East. Movement-Easterly	Warning E-mail and Fax sent to State Disaster management Authority and Concern DMs	THUNDER- STORM WITH RAIN	Khagaria, Saharsa, Madhepura, Purnia
		010020 - 010120	Single Cell. Maximum Reflectivity : 45 dBZ Echo Top : 14 KM	Range : 200 KM from DWR Patna in North- North-West Movement- Easterly	Warning E-mail and Fax sent to State Disaster management Authority and Concern DMs	N/A	West Champaran
		010200 - 010300	Multiple Cell. Maximum Reflectivity : 50 dBZ Echo Top : 9.3 KM	Range : 175 KM from DWR Patna in North- West Movement-Easterly	Warning E-mail and Fax sent to State Disaster management Authority and Concern DMs	N/A	West Champaran, East Champaran, Gopalganj
