Summary and Conclusions:

Day-1 & Day-2:

Under the influence of the monsoon current Nicobar Islands will experience heavy rain during the next 24 hours.

The upper air cyclonic circulation over Tripura & neighbourhood will cause thunderstorm with gusty winds which will also produce heavy rainfall at isolated places over Assam& Meghalaya and NMMT on day 1. Thunderstorm with gusty winds will continue over Assam& Meghalaya on day 2 also.

The trough which runs from west Bihar to west central Bay of Bengal upto 1.5 km above mean sea level will cause incursion of moisture laden southerlies over Bihar and neighbouring states resulting in thunderstorm with squally winds on day1 and thunderstorm with gusty winds on day2. This will aid in isolated heavy rainfall over Gangetic and Sub-Himalayan West Bengal on day 1. The upper air cyclonic circulation over north Chhattisgarh and adjoining Odisha will cause thunderstorm with squall to form over Orissa.

Thunderstorm with gusty winds are expected on day1 and day2 over Kerala, Interior Tamilnadu, South Interior Karnataka mainly attributable to the trough at mean sea level from south coastal Andhra Pradesh to Comorin area.

The Western Disturbance present will cause thunderstorm accompanied by squall and hail to occur over Himachal Pradesh and Uttarakhand on day1. Thunderstorm with squall will continue on day2 also, however no hail is expected on day2. Similarly, the upper air cyclonic circulation lies over Punjab & neighbourhood is expected to cause thunderstorm with squall over Punjab on day1.
